MOHAMMED FAIZ Y

Aspiring Information Technology Student

7397470456 faizacct@gmail.com mohammed-faiz-y Chennai, India FAIZ1409

SUMMARY

Full Stack Developer with hands-on experience building scalable web applications using MongoDB, Express.js, React, and Node.js (MERN). Skilled in developing RESTful APIs, responsive UI components, and optimized backend systems to enhance application performance and user experience.

EXPERIENCE

Data Analyst **Jul 2024 – Aug 2024**

Customer Analytics LLC, Chennai, India

- Analyzed 50K+ customer datasets using SQL to identify patterns and behavioral insights.
- Planned 5+ interactive Power BI dashboards for KPI monitoring.
- Improved data processing efficiency by optimizing SQL queries and automating reports.

MERN Stack Developer Intern **Jan 2026 – April 2026**

UptoSkills (Remote)

- Developed full-stack web applications using **MongoDB, Express.js, React, and Node.js**, improving API response time by 30%.
- Built 10+ responsive UI components and integrated RESTful APIs, reducing page load time by 25% and improving user experience.
- Collaborated in an agile team to deliver scalable solutions, and improving application stability through structured debugging.

EDUCATION

Bachelor of Technology (B.Tech) **2023 – 2027**

St. Joseph's College of Engineering • Chennai **CGPA: 8.64**

CBSE Class XII (Higher Secondary) **2022 – 2023**

Asan Memorial Senior Secondary School, Chennai **Percentage: 90.2**

CERTIFICATIONS

Introduction to frontend with advanced react- Meta
Programming in Java - Infosys Springboard
Database Management – Coding Ninjas : Top Performer

SKILLS

Technical Skills

Languages:	Java, Python, SQL
Frontend:	React, HTML5, CSS, JavaScript, React
Backend:	Node.js, Spring Boot, REST APIs, MongoDB
Cloud:	AWS
Tools:	GitHub, Tableau, Power BI
ProblemSolving:	300+ problems solved on LeetCode (DSA)

Leadership

CSI Hosting Leader **Valid till 2027**

Led hosting and coordination for CSI events, ensuring smooth execution and active audience engagement.

Open Contributor – GirlScript Summer of Code (GSSoC)

Selected as an Open Contributor in GSSoC, contributing to real-world open-source projects on GitHub.

KEY ACHIEVEMENTS

MAKEATHON-1.0 and 2.0 Finalist

Finalist for developing an AI-based interview preparation system using voice and posture analysis.

HackIndia Finalist

Built an AI-driven forest resource assessment platform for environmental analytics.

ZENITH26 Symposium Winner

Won 1st prize in InnoQuiz, a technical quiz event. Secured 2nd place in Codebreakers

School Pupil Leader

Represented the student body and led the coordination of major school and inter-school events, fostering leadership and teamwork.

PROJECTS

ArenIQ – Water body Encroachment Monitoring System

- Constructed a full-stack system handling 100+ user reports with real-time API processing using Flutter, React, Node.js, and Python to detect and report water body encroachments.
- Automated Sentinel-2 satellite data retrieval via Copernicus CDSE API and applied NDWI for change detection.
- Built a Random Forest model achieving 75% classification accuracy on satellite imagery data (Construction, Sand Mining, Waste Dumping,Land Filling).
- Implemented a Flutter mobile app with OTP authentication, GPS tagging, and image-based reporting integrated with Supabase.

  GitHub: https://github.com/FAIZ1409/ArenIQ

FRA-ATLAS WebGIS Platform

- Engineered an AI-enabled WebGIS platform for forest resource assessment with spatial visualization.
- Created an analytics dashboards and GIS mapping tools for environmental decision support.

  GitHub: https://github.com/FAIZ1409/FRA-ATLAS-AND-DSS

Food Freshness AI Detector

- Developed an AI-powered system to detect food spoilage using computer vision techniques and TensorFlow models.
- Added backend APIs with FastAPI and designed a UI to classify freshness using color pattern analysis.
